

3-shot Stun Gun

Powered by N2

According to IEC 479-1 report, DC is 2-4 times safer than AC.

Feature :

1. Allow to deploy 3 probes for multi-target defense up to 6m and permit to disable attackers by direct contact to meet intimidating purpose.
2. The ballistic design of the cartridge aims to increase the shooting accuracy and enhance the effectiveness.
3. Provide two stunning modes: (1). MANUAL: Continue to stun manually (2). AUTO: To give 5-second electric shocks but pause 1-sec as a circle and repeat the circles continuously. This mode allows to keep dumping the guy while let go of stun gun to arrest the target within seconds.
4. The unique DC technology gives bigger power while much safer than traditional AC type according to IEC479-1 report.
5. Feature in easy usage, anti-robbery design, high temperature resistance housing and selectable alerting buzzer/mute mode when activating the device.
6. With two 1913 rails to attach external camera and illuminator.

Part name:

Specification :

Model	A-3
Battery	Rechargeable lithium battery · 7.4V DC able to give continuous electric shock above 30 minutes.
Current	DC
Penetration	Around 2cm clothing
Peak open circuit arcing voltage	DC 30KV±10
Frequency	0Hz(DC)
Output current	<0.24mA(connect 100MΩimpedance load)
Temperature	-10°C ~ 55°C
Weight	<400g(excluding cartridges)
Dimension	
Warranty	One year

- (1). A-3 Main unit
- (2). 6m probe x 6
- (3). Charge
- (4). Belt clip

- Options :
- (a) Tactical camcorder
 - (b) Tactical illuminator
